MYRRIAME DOSSO | *Junior Software Developer*

Atlanta, GA

MyrriameTD@gmail.com | github.com/myrriame | myrriame.heroukuapp.com | 770-826-2709

I am an enthusiastic developer that is dedicated to perfecting my craft by learning from experienced developers and looking forward to an opportunity that allows me to use my problem solving skills.

Skills

- Frontend: CSS, HTML5, JavaScript, XML, AJAX, Responsive Design, Debugging, Responsive design
- Backend/Server side: JavaScript, Node.js, Express, React, RESTful API, Fetch, AJAX, XML, Debugging, Git
- Frameworks: jQuery, Bootstrap, EJS, Express ES6 template
- Database: Sequelize, PostgreSQL, Data modeling
- Fluent in French

Projects

Foodie ATL | **Github Repo** | **Visit Page**

Foodie ATL is a backend focused application that was created to allow local foodies to search for different restaurants in the metro atlanta area. This app not only allows the user to swipe left or right on restaurants but lets the user view the menu, popular dishes, hours of operation, ect. by clicking the image. My responsibility was to connect the database to the site, seeding the database, creating CRUD routes and connecting designated buttons to them, creating each route's template and some CSS. Currently *in the process of converting into a React App!*
Stack: JavaScript, Express, NodeJS, EJS, Bootstrap, Sequelize

ART District | **Github Repo** | **Visit Page**

ART District is an informative and comprehensive application that creates a space for art-lovers and creatives to learn the stories of emerging and established artists of color. The app features a variety of art including fine art, performance art, photography, music, literary art and culinary art. My Responsibility was frontend functionality/styling pages, data routing and seeding data into tables.
Stack: React, JavaScript, Express, NodeJS, Sequelize, Passport, Styled Components, ElephantSQL

Cocktails & Quotes | **Github Repo** | **Visit Page**

C & Q is a responsive frontend focused app that integrates the Cocktail DB API and Ron Swanson Quotes API. Based on the user's search, the app outputs drink names, pictures and drink ingredients. The app also generates a random quote once the quote card is clicked for the user's enjoyment. My responsibility was to connect both API's, create the grid for each drink search, error handling, website functionality and CSS.
Stack: JavaScript, CSS, AJAX Request

Education

Digital Crafts Bootcamp - Atlanta, GA   *Full-Stack Web Development Program* Online
JANUARY 2021 - JULY 2021
- Created 2+ projects a month while learning a full stack curriculum
